

Cost report	Number of hospitals eligible for special exceptions	Special exceptions as a fraction of capital payments to all hospitals
PPS IX .....	—	—
PPS X .....	—	—
PPS XI .....	2	—
PPS XII .....	5	0.0001
PPS XIII .....	7	0.0001
PPS XIV .....	14	0.0002
PPS XV .....	18	0.0009
PPS XVI .....	27	0.0018
PPS XVII .....	N/A	N/A

We note that hospitals still have two more cost reporting periods (PPS XVII and PPS XVIII) to complete their projects in order to be eligible for special exceptions, and, therefore, we estimate that about 20 additional hospitals could qualify for special exceptions. Thus, we project that special exception payments as a fraction of capital payments to all hospitals to be approximately 0.0030.

Because special exceptions are budget neutral, in the May 9, 2002 proposed rule (67 FR 31516), we proposed to offset the Federal capital rate by 0.40 percent for special exceptions for FY 2003. Therefore, we proposed the exceptions adjustment factor for special exception payments to equal 0.9960 (1–0.0040) to account for special exception payments in FY 2003. For this final rule, based on updated data, we are offsetting the Federal capital rate by a factor of 0.9970 (1–0.0030) to account for special exceptions payments in FY 2003.

For FY 2002, we estimated that total (regular and special) exceptions payments would equal 0.71 percent of aggregate payments based on the Federal rate. Therefore, we applied an exceptions reduction factor of 0.9929 (1–0.0071) in determining the Federal rate. As we stated, we estimate that exceptions payments for FY 2003 will equal 0.30 percent of aggregate payments based on the Federal rate. Therefore, we are applying an exceptions payment reduction factor of 0.9970 (1–0.0030) to the Federal rate for FY 2003. The exceptions adjustment factor for FY 2003 is 0.41 percent higher than the factor for FY 2002 published in the August 1, 2001 final

rule. This increase is primarily due to the expiration of the regular exceptions provision and the narrowly defined nature of the special exceptions policy.

The exceptions reduction factors are not built permanently into the rates; that is, the factors are not applied cumulatively in determining the Federal rate. Therefore, the net change in the exceptions adjustment to the FY 2003 Federal rate is 0.9970/0.9929, or 1.0041.

#### 5. Special Adjustment to Restore the 2.1 Percent Reduction to the Standard Federal Capital Prospective Payment System Payment Rate

As we explained in section VI.D. of the preamble of this final rule, section 1886(g)(1)(A) of the Act, as amended by section 4402 of Public Law 105–33, requires the Secretary to reduce the unadjusted standard Federal capital prospective payment system payment rate by 2.1 percent for discharges on or after October 1, 1997, and through September 30, 2002. Therefore, under the statute the additional 2.1 percent reduction no longer applies to discharges occurring after September 30, 2002. Accordingly, we are revising § 412.308(b) to restore the 2.1 percent reduction to the unadjusted standard Federal capital prospective payment system payment rate for discharges occurring on or after October 1, 2002 to the level that it would have been without the reduction.

As we state in section VI.D. of the preamble of this final rule and in the August 29, 1997 final rule (62 FR 46012), we applied a factor of 0.8222 in FY 1998 to account for both the reduction equal to the FY 1995 budget neutrality factor (0.1568) and the 2.1 percent reduction (0.021) provided for under section 4402 of Public Law 105–33. In order to determine the adjustment factor needed to restore the 2.1 percent reduction, we divide the amount of the adjustment without the 2.1 percent reduction ( $1 - 0.1568 = 0.8432$ ) by the amount of the adjustment with the 2.1 percent reduction (0.8222). Therefore, we are applying a factor of 1.02554 ( $0.8432/0.8222$ ) to the unadjusted FY 2002 standard Federal capital prospective payment system payment rate to restore the 2.1 percent reduction for discharges occurring on or after October 1, 2002.

#### 6. Standard Capital Federal Rate for FY 2003

For FY 2002, the capital Federal rate was \$390.74. In this final rule, we are establishing a capital Federal rate of \$407.01 for FY 2003. The Federal rate for FY 2003 was calculated as follows:

- The FY 2003 update factor is 1.0110; that is, the update is 1.10 percent.
- The FY 2003 budget neutrality adjustment factor that is applied to the standard Federal payment rate for changes in the DRG relative weights and in the GAF is 0.9957.
- The FY 2003 outlier adjustment factor is 0.9469.
- The FY 2003 (special) exceptions payments adjustment factor is 0.9970.
- The special adjustment factor for FY 2003 to restore the 2.1 percent reduction to the standard Federal rate is 1.0255.

Since the Federal rate has already been adjusted for differences in case-mix, wages, cost-of-living, indirect medical education costs, and payments to hospitals serving a disproportionate share of low-income patients, we have made no additional adjustments in the standard Federal rate for these factors, other than the budget neutrality factor for changes in the DRG relative weights and the GAF.

We are providing a chart that shows how each of the factors and adjustments for FY 2003 affected the computation of the FY 2003 Federal rate in comparison to the FY 2002 Federal rate. The FY 2003 update factor has the effect of increasing the Federal rate by 1.10 percent compared to the FY 2002 Federal rate, while the geographic and DRG budget neutrality factor has the effect of decreasing the Federal rate by 0.43 percent. The FY 2003 outlier adjustment factor has the effect of increasing the Federal rate by 0.48 percent compared to the FY 2002 Federal rate. The FY 2003 exceptions reduction factor has the effect of increasing the Federal rate by 0.41 percent compared to the exceptions reduction for FY 2002. The special adjustment factor for FY 2003 to restore the 2.1 percent reduction to the standard Federal rate has the effect of increasing the Federal rate by 2.55 percent compared to the FY 2002 Federal rate. The combined effect of all the changes is to increase the Federal rate by 4.16 percent compared to the FY 2002 Federal rate.

#### COMPARISON OF FACTORS AND ADJUSTMENTS: FY 2002 FEDERAL RATE AND FY 2003 FEDERAL RATE

	FY 2002	FY 2003	Change	Percent change
Update factor <sup>1</sup> .....	1.0130	1.0110	1.0110	1.10
GAF/DRG Adjustment Factor <sup>1</sup> .....	0.9934	0.9957	0.9957	-0.43
Outlier Adjustment Factor <sup>2</sup> .....	0.9424	0.9469	1.0048	0.48
Exceptions Adjustment Factor <sup>2</sup> .....	0.9929	0.9970	1.0041	0.41
Special Adjustment <sup>3</sup> .....	N/A	1.0255	1.0255	2.55
Federal Rate .....	\$390.74	\$407.01	1.0416	4.16

<sup>1</sup> The update factor and the GAF/DRG budget neutrality factors are built permanently into the rates. Thus, for example, the incremental change from FY 2002 to FY 2003 resulting from the application of the 0.9957 GAF/DRG budget neutrality factor for FY 2003 is 0.9957.

<sup>2</sup> The outlier reduction factor and the exceptions reduction factor are not built permanently into the rates; that is, these factors are not applied cumulatively in determining the rates. Thus, for example, the net change resulting from the application of the FY 2003 outlier reduction factor is 0.9469/0.9424, or 1.0048.

<sup>3</sup> Section 1886(g)(1)(A) of the Act requires, for discharges on or after October 1, 1997, and through September 30, 2002, the Secretary to reduce the unadjusted standard Federal capital prospective payment system payment rate by 2.1 percent. Thus, the 2.1 percent reduction no longer applies to discharges occurring after September 30, 2002, and we are proposing to restore the 2.1 percent reduction by applying a factor of 1.0255 (see section VI.D. of the preamble of this final rule).

We are also providing a chart that shows how the final FY 2003 capital Federal rate

differs from the proposed FY 2003 capital Federal rate.

## COMPARISON OF FACTORS AND ADJUSTMENTS: FY 2003 PROPOSED FEDERAL RATE AND FY 2003 FINAL FEDERAL RATE

	Proposed FY 2003	Final FY 2003	Change	Percent change
Update factor .....	1.0110	1.0110	1.0000	0.00
GAF/DRG Adjustment Factor .....	1.0024	0.9957	0.9933	-0.67
Outlier Adjustment Factor .....	0.9460	0.9469	1.0010	0.10
Exceptions Adjustment Factor .....	0.9960	0.9970	1.0010	0.10
Special Adjustment .....	1.0255	1.0255	1.0000	0.00
Federal Rate .....	\$408.90	407.01	0.9954	-0.46

### 7. Special Rate for Puerto Rico Hospitals

As explained at the beginning of section II.D. of this Addendum, hospitals in Puerto Rico are paid based on 50 percent of the Puerto Rico rate and 50 percent of the Federal rate. The Puerto Rico rate is derived from the costs of Puerto Rico hospitals only, while the Federal rate is derived from the costs of all acute care hospitals participating in the prospective payment system (including Puerto Rico). To adjust hospitals' capital payments for geographic variations in capital costs, we apply a GAF to both portions of the blended rate. The GAF is calculated using the operating prospective payment system wage index and varies, depending on the MSA or rural area in which the hospital is located. We use the Puerto Rico wage index to determine the GAF for the Puerto Rico part of the capital-blended rate and the national wage index to determine the GAF for the national part of the blended rate.

Because we implemented a separate GAF for Puerto Rico in FY 1998, we also apply separate budget neutrality adjustments for the national GAF and for the Puerto Rico GAF. However, we apply the same budget neutrality factor for DRG reclassifications and recalibration nationally and for Puerto Rico. As we stated in section III.A.4. of this Addendum, for Puerto Rico the proposed GAF budget neutrality factor was 1.0080, while the proposed DRG adjustment was 1.0034, for a proposed combined cumulative adjustment of 1.0115. For this final rule, based on updated data, the FY 2003 GAF budget neutrality factor is 1.0081, while the DRG adjustment is 0.9966, for a combined cumulative adjustment for Puerto Rico of 1.0047.

In computing the payment for a particular Puerto Rico hospital, the Puerto Rico portion of the rate (50 percent) is multiplied by the Puerto Rico-specific GAF for the MSA in which the hospital is located, and the national portion of the rate (50 percent) is multiplied by the national GAF for the MSA in which the hospital is located (which is computed from national data for all hospitals in the United States and Puerto Rico). In FY 1998, we implemented a 17.78 percent reduction to the Puerto Rico rate as a result of Public Law 105-33.

For FY 2002, before application of the GAF, the special rate for Puerto Rico hospitals was \$187.73. With the changes we proposed to the factors used to determine the rate, the proposed FY 2003 special rate for Puerto Rico was \$199.70. For this final rule, based on the final factors, the FY 2003 capital rate for Puerto Rico is \$198.29.

#### B. Calculation of Inpatient Capital-Related Prospective Payments for FY 2003

With the end of the capital prospective payment system transition period in FY 2001, all hospitals (except "new" hospitals under § 412.324(b) and under § 412.304(c)(2)) are paid based on 100 percent of the Federal rate in FY 2003. The applicable Federal rate was determined by making adjustments as follows:

- For outliers, by dividing the standard Federal rate by the outlier reduction factor for that fiscal year; and
- For the payment adjustments applicable to the hospital, by multiplying the hospital's GAF, disproportionate share adjustment factor, and IME adjustment factor, when appropriate.

For purposes of calculating payments for each discharge during FY 2003, the standard Federal rate is adjusted as follows: (Standard Federal Rate)  $\times$  (DRG weight)  $\times$  (GAF)  $\times$  (Large Urban Add-on, if applicable)  $\times$  (COLA adjustment for hospitals located in Alaska and Hawaii)  $\times$  (1 + Disproportionate Share Adjustment Factor + IME Adjustment Factor, if applicable). The result is the adjusted Federal rate.

Hospitals also may receive outlier payments for those cases that qualify under the thresholds established for each fiscal year. Section 412.312(c) provides for a single set of thresholds to identify outlier cases for both inpatient operating and inpatient capital-related payments. The outlier thresholds for FY 2003 are in section II.A.4.c. of this Addendum. For FY 2003, a case qualifies as a cost outlier if the cost for the case plus the IME and DSH payments is greater than the prospective payment rate for the DRG plus \$33,560.

An eligible hospital may also qualify for a special exception payment under § 412.348(g) for up through the 10th year beyond the end of the capital transition

period if it meets: (1) A project need requirement described at § 412.348(g)(2), which in the case of certain urban hospitals includes an excess capacity test as described at § 412.348(g)(4); and (2) a project size requirement as described at § 412.348(g)(5). Eligible hospitals include sole community hospitals, urban hospitals with at least 100 beds that have a DSH patient percentage of at least 20.2 percent or qualify for DSH payments under § 412.106(c)(2), and hospitals that have a combined Medicare and Medicaid inpatient utilization of at least 70 percent. Under § 412.348(g)(8), the amount of a special exceptions payment is determined by comparing the cumulative payments made to the hospital under the capital prospective payment system to the cumulative minimum payment level. This amount is offset by: (1) Any amount by which a hospital's cumulative capital payments exceed its cumulative minimum payment levels applicable under the regular exceptions process for cost reporting periods beginning during which the hospital has been subject to the capital prospective payment system; and (2) any amount by which a hospital's current year operating and capital payments (excluding 75 percent of operating DSH payments) exceed its operating and capital costs. Under § 412.348(g)(6), the minimum payment level is 70 percent for all eligible hospitals.

During the transition period, new hospitals (as defined under § 412.300) were exempt from the capital prospective payment system for their first 2 years of operation and are paid 85 percent of their reasonable costs during that period. Effective with the third year of operation through the remainder of the transition period, under § 412.324(b) we paid the hospital under the appropriate transition methodology. If the hold-harmless methodology was applicable, the hold-harmless payment for assets in use during the base period would extend for 8 years, even if the hold-harmless payments extend beyond the normal transition period. As discussed in section VI.B. of the preamble of this final rule, under § 412.304(c)(2), we will pay a new hospital 85 percent of their reasonable costs during the first 2 years of operation unless it elects to receive payment based on 100 percent of the Federal rate. Effective with

the third year of operation through the remainder of the transition period, we will pay the hospital based on 100 percent of the capital Federal (that is, the same methodology used to pay all other hospitals subject to capital prospective payment system).

#### C. Capital Input Price Index

##### 1. Background

Like the operating input price index, the capital input price index (CIPI) is a fixed-weight price index that measures the price changes associated with costs during a given year. The CIPI differs from the operating input price index in one important aspect—the CIPI reflects the vintage nature of capital, which is the acquisition and use of capital over time. Capital expenses in any given year are determined by the stock of capital in that year (that is, capital that remains on hand from all current and prior capital acquisitions). An index measuring capital price changes needs to reflect this vintage nature of capital. Therefore, the CIPI was developed to capture the vintage nature of capital by using a weighted-average of past capital purchase prices up to and including the current year.

We periodically update the base year for the operating and capital input prices to reflect the changing composition of inputs for operating and capital expenses. The CIPI was last rebased to FY 1992 in the August 30, 1996 final rule (61 FR 46196). In this final rule, we are revising and rebasing the CIPI to a FY 1997 base year to reflect the more recent structure of capital costs. For further details on the rebasing and revision of the CIPI, see section IV.B. of this final rule.

##### 2. Forecast of the CIPI for Federal Fiscal Year 2003

We are forecasting the CIPI to increase 0.7 percent for FY 2003. This reflects a projected 1.3 percent increase in vintage-weighted depreciation prices (building and fixed equipment, and movable equipment) and a 3.0 percent increase in other capital expense prices in FY 2003, partially offset by a 2.3 percent decline in vintage-weighted interest rates in FY 2003. The weighted average of these three factors produces the 0.7 percent increase for the CIPI as a whole.

#### IV. Changes to Payment Rates for Excluded Hospitals and Hospital Units: Rate-of-Increase Percentages

The inpatient operating costs of hospitals and hospital units excluded from the acute care hospital inpatient prospective payment system are subject to rate-of-increase limits established under the authority of section 1886(b) of the Act, which is implemented in regulations at § 413.40. Under these limits, a hospital-specific target amount (expressed in terms of the inpatient operating cost per discharge) is set for each hospital, based on the hospital's own historical cost experience trended forward by the applicable rate-of-increase percentages (update factors).

Under existing § 413.40(c)(4)(iii)(B), for cost reporting periods beginning and during FYs 1998 and through 2002, in the case of a psychiatric hospital or hospital unit, a rehabilitation hospital or hospital unit, or a long-term care hospital, the target amount may not exceed the updated figure for the 75th percentile of target amounts adjusted to take into account the differences between average wage-related costs in the area of the hospital and the national average of such costs within the same class of hospitals for hospitals and hospital units in the same class (psychiatric, rehabilitation, and long-term care) for cost reporting periods ending during FY 1996. The target amount is multiplied by the number of Medicare discharges in a hospital's cost reporting period, yielding the ceiling on aggregate Medicare inpatient operating costs for the cost reporting period.

Each hospital-specific target amount is adjusted annually, at the beginning of each hospital's cost reporting period, by an applicable update factor. Under existing §§ 413.40(c)(4)(ii) and (d)(1)(i) and (ii), effective for cost reporting periods beginning during FY 2003, payments to existing excluded hospitals and hospital units will no longer be subject to a 75th percentile cap. These excluded hospitals and hospital units will be paid based on their aggregate Medicare inpatient operating costs, which may not exceed their ceiling. The ceiling on a hospital's or hospital unit's aggregate Medicare inpatient operating costs would be computed using the hospital's or hospital unit's target amount from the previous cost reporting period updated using the rate-of-increase percentage specified in § 413.40(c)(3)(viii) and multiplied by the total number of Medicare discharges.

Section 1886(b)(3)(B) of the Act, as implemented in regulations at § 413.40(c)(3)(viii), provides that, for cost reporting periods beginning on or after October 1, 2002, the update factor for a hospital or hospital unit is the percentage increase projected by the hospital market basket index. The most recent projected forecast of the market basket percentage increase for FY 2003 for hospitals and hospital units excluded from the acute care hospital inpatient prospective payment system is 3.5 percent. This percentage change is estimated by CMS' Office of the Actuary and reflects the average change in the price of goods and services purchased by hospitals to furnish inpatient hospital care. Therefore, we are providing that the update to a hospital's target amount for its cost reporting period beginning in FY 2003 is 3.5 percent.

As discussed in section VII. of the preamble of this final rule, we are making an adjustment to the updated cap on the target amounts per discharge for each class of new excluded hospitals and hospital units for cost reporting periods beginning during FY 2003, using the prospective payment system wage index without taking into account the reclassifications under sections 1886(d)(8)(B) and (d)(10) of the Act. For a new provider, the labor-related share of the target amount is multiplied by the appropriate geographic area wage index, without regard to prospective payment system reclassifications, and added to the nonlabor-related share in order to determine the per case limit on payment under the statutory payment methodology for new providers.

Regulations at § 413.40(f)(2)(ii) specify the payment methodology for new hospitals and hospital units, effective October 1, 1997.

For cost reporting periods beginning in FY 2003, in the May 9, 2002 proposed rule, we included the following proposed caps:

Class of excluded hospital or unit	FY 2003 proposed labor-related share	FY 2003 proposed nonlabor-related share
Psychiatric .....	\$ 7,047	\$2,801
Long-Term Care .....	17,269	6,866

In this final rule, using updated data, we have recalculated the proposed caps for cost reporting periods beginning in FY 2003. The final FY 2002 caps are listed below:

Class of excluded hospital or unit	FY 2003 labor-related share	FY 2003 nonlabor-related share
Psychiatric .....	\$7,054	\$2,804
Long-Term Care .....	17,286	6,872

Effective for cost reporting periods beginning on or after October 1, 2002, this payment limitation is no longer applicable to new rehabilitation hospitals and units since they will be paid under the inpatient rehabilitation facility prospective payment system.

Regulations at § 413.40(d) specify the formulas for determining bonus and relief payments for excluded hospitals and specify established criteria for an additional bonus payment for continuous improvement.

#### V. Tables

This section contains the tables referred to throughout the preamble to this final rule and in this Addendum. For purposes of this final rule, and to avoid confusion, we have retained the designations of Tables 1 through 5 that were first used in the September 1, 1983 initial prospective payment final rule (48 FR 39844). Tables 1A, 1C, 1D, 2, 3A, 3B, 4A, 4B, 4C, 4F, 4G, 4H, 5, 6A, 6B, 6C, 6D, 6E, 6F, 6G, 6H, 7A, 7B, 8A, 8B, 9, and 10 are presented below. The tables presented below are as follows:

Table 1A—National Adjusted Operating Standardized Amounts, Labor/Nonlabor

- Table 1C—Adjusted Operating Standardized Amounts for Puerto Rico, Labor/Nonlabor
- Table 1D—Capital Standard Federal Payment Rate

428.33	Acute on chronic diastolic heart failure .....	Y	5	115, 121, 124, 127
428.40	Unspecified combined systolic and diastolic heart failure .....	Y	5	115, 121, 124, 127
428.41	Acute combined systolic and diastolic heart failure .....	Y	5	115, 121, 124, 127
428.42	Chronic combined systolic and diastolic heart failure .....	Y	5	115, 121, 124, 127
428.43	Acute on chronic combined systolic and diastolic heart failure .....	Y	5	115, 121, 124, 127
438.6	Alterations of sensations .....	N	1	12
438.7	Disturbances of vision .....	N	1	12
438.83	Facial weakness .....	N	1	12
438.84	Ataxia .....	N	1	12
438.85	Vertigo .....	N	1	12
443.21	Dissection of carotid artery .....	N	5	130, 131

TABLE 6A.—NEW DIAGNOSIS CODES—Continued

Diagnosis code	Description	CC	MDC	DRG
443.22	Dissection of iliac artery .....	N	5	130, 131
443.23	Dissection of renal artery .....	N	11	331, 332, 333
443.24	Dissection of vertebral artery .....	N	5	130, 131
443.29	Dissection of other artery .....	N	5	130, 131
445.01	Atheroembolism, upper extremity .....	Y	5	130, 131
445.02	Atheroembolism, lower extremity .....	Y	5	130, 131
445.81	Atheroembolism, kidney .....	Y	11	331, 332, 333
445.89	Atheroembolism, other site .....	Y	5	130, 131
454.8	Varicose veins of the lower extremities, with other complications .....	N	5	130, 131
459.10	Postphlebotic syndrome without complications .....	N	5	130, 131
459.11	Postphlebotic syndrome with ulcer .....	N	5	130, 131
459.12	Postphlebotic syndrome with inflammation .....	N	5	130, 131
459.13	Postphlebotic syndrome with ulcer and inflammation .....	N	5	130, 131
459.19	Postphlebotic syndrome with other complication .....	N	5	130, 131
459.30	Chronic venous hypertension without complications .....	N	5	130, 131
459.31	Chronic venous hypertension with ulcer .....	N	5	130, 131
459.32	Chronic venous hypertension with inflammation .....	N	5	130, 131
459.33	Chronic venous hypertension with ulcer and inflammation .....	N	5	130, 131
459.39	Chronic venous hypertension with other complication .....	N	5	130, 131
537.84	Dielulafoy lesion (hemorrhagic) of stomach and duodenum .....	Y	6	174, 175
569.86	Dieulafoy lesion (hemorrhagic) of intestine .....	Y	6	188, 189, 190
633.00	Abdominal pregnancy without intrauterine pregnancy .....	N	14	378
633.01	Abdominal pregnancy with intrauterine pregnancy .....	N	14	378
633.10	Tubal pregnancy without intrauterine pregnancy .....	N	14	378
633.11	Tubal pregnancy with intrauterine pregnancy .....	N	14	378
633.20	Ovarian pregnancy without intrauterine pregnancy .....	N	14	378
633.21	Ovarian pregnancy with intrauterine pregnancy .....	N	14	378
633.80	Other ectopic pregnancy without intrauterine pregnancy .....	N	14	378
633.81	Other ectopic pregnancy with intrauterine pregnancy .....	N	14	378
633.90	Unspecified ectopic pregnancy without intrauterine pregnancy .....	N	14	378
633.91	Unspecified ectopic pregnancy with intrauterine pregnancy .....	N	14	378
747.83	Persistent fetal circulation .....	N	15	387, 389
765.20	Unspecified weeks of gestation .....	N	15	391
765.21	Less than 24 completed weeks of gestation .....	N	15	386
765.22	24 completed weeks of gestation .....	N	15	386
765.23	25-26 completed weeks of gestation .....	N	15	386
765.24	27-28 completed weeks of gestation .....	N	15	387, 388
765.25	29-30 completed weeks of gestation .....	N	15	387, 388
765.26	31-32 completed weeks of gestation .....	N	15	387, 388
765.27	33-34 completed weeks of gestation .....	N	15	387, 388
765.28	35-36 completed weeks of gestation .....	N	15	387, 388
765.29	37 or more completed weeks of gestation .....	N	15	391
770.81	Primary apnea of newborn .....	N	15	390
770.82	Other apnea of newborn .....	N	15	390
770.83	Cyanotic attacks of newborn .....	N	15	390
770.84	Respiratory failure of newborn .....	Y	15	387, 389
770.89	Other respiratory problems after birth .....	N	15	390
771.81	Septicemia [sepsis] of newborn .....	Y	15	387, 389
771.82	Urinary tract infection of newborn .....	N	15	387, 389
771.83	Bacteremia of newborn .....	Y	15	387, 389
771.89	Other infections specific to the perinatal period .....	N	15	387, 389
779.81	Neonatal bradycardia .....	N	15	390
779.82	Neonatal tachycardia .....	N	15	390
779.89	Other specified conditions originating in the perinatal period .....	N	15	390
780.91	Fussy infant (baby) .....	N	23	463, 464
780.92	Excessive crying of infant (baby) .....	N	23	463, 464
780.99	Other general symptoms .....	N	23	463, 464
781.93	Ocular torticollis .....	N	8	243
795.00	Nonspecific abnormal Papanicolaou smear of cervix, unspecified .....	N	13	358, 359, 369
795.01	Atypical squamous cell changes of undetermined significance favor benign (ASCUS favor benign).	N	13	358, 359, 369
795.02	Atypical squamous cell changes of undetermined significance favor dysplasia (ASCUS favor dysplasia).	N	13	358, 359, 369
795.09	Other nonspecific abnormal Papanicolaou smear of cervix .....	N	13	358, 359, 369
795.31	Nonspecific positive findings for anthrax .....	N	18	423
795.39	Other nonspecific positive culture findings .....	N	18	423
813.45	Torus fracture of radius .....	N	8	250, 251, 252
823.40	Torus fracture, tibia alone .....	N	24	487
823.41	Torus fracture, fibula alone .....	N	8	253, 254, 255
			24	487

TABLE 6A.—NEW DIAGNOSIS CODES—Continued

Diagnosis code	Description	CC	MDC	DRG
823.42	Torus fracture, fibula with tibia .....	N	8 24	253, 254, 255 487
995.90	Systemic inflammatory response syndrome, unspecified .....	Y	18	416, 417
995.91	Systemic inflammatory response syndrome due to infectious process without organ dysfunction.	Y	18	416, 417
995.92	Systemic inflammatory response syndrome due to infectious process with organ dysfunction.	Y	18	416, 417
995.93	Systemic inflammatory response syndrome due to non-infectious process without organ dysfunction.	Y	18	416, 417
995.94	Systemic inflammatory response syndrome due to non-infectious process with organ dysfunction.	Y	18	416, 417
998.31	Disruption of internal operation wound .....	Y	21	452, 453
998.32	Disruption of external operation wound .....	Y	21	452, 453
V01.81	Contact with or exposure to communicable diseases, anthrax .....	N	15 23	391 <sup>1</sup> 467
V01.89	Contact with or exposure to communicable diseases, other communicable diseases.	N	15 23	391 <sup>1</sup> 467
V13.21	Personal history of pre-term labor .....	N	23	467
V13.29	Personal history of other genital system and obstetric disorders .....	N	23	467
V23.41	Pregnancy with history of pre-term labor .....	N	14	469
V23.49	Pregnancy with other poor obstetric history .....	N	14	469
V46.2	Other dependence on machines, supplemental oxygen .....	N	23	467
V54.10	Aftercare for healing traumatic fracture of arm, unspecified .....	N	8	249
V54.11	Aftercare for healing traumatic fracture of upper arm .....	N	8	249
V54.12	Aftercare for healing traumatic fracture of lower arm .....	N	8	249
V54.13	Aftercare for healing traumatic fracture of hip .....	N	8	249
V54.14	Aftercare for healing traumatic fracture of leg, unspecified .....	N	8	249
V54.15	Aftercare for healing traumatic fracture of upper leg .....	N	8	249
V54.16	Aftercare for healing traumatic fracture of lower leg .....	N	8	249
V54.17	Aftercare for healing traumatic fracture of vertebrae .....	N	8	249
V54.19	Aftercare for healing traumatic fracture of other bone .....	N	8	249
V54.20	Aftercare for healing pathologic fracture of arm, unspecified .....	N	8	249
V54.21	Aftercare for healing pathologic fracture of upper arm .....	N	8	249
V54.22	Aftercare for healing pathologic fracture of lower arm .....	N	8	249
V54.23	Aftercare for healing pathologic fracture of hip .....	N	8	249
V54.24	Aftercare for healing pathologic fracture of leg, unspecified .....	N	8	249
V54.25	Aftercare for healing pathologic fracture of upper leg .....	N	8	249
V54.26	Aftercare for healing pathologic fracture of lower leg .....	N	8	249
V54.27	Aftercare for healing pathologic fracture of vertebrae .....	N	8	249
V54.29	Aftercare for healing pathologic fracture of other bone .....	N	8	249
V54.81	Aftercare following joint replacement .....	N	8	249
V54.89	Other orthopedic aftercare .....	N	8	249
V58.42	Aftercare following surgery for neoplasm .....	N	23	465, 466
V58.43	Aftercare following surgery for injury and trauma .....	N	23	465, 466
V58.71	Aftercare following surgery of the sense organs, NEC .....	N	23	465, 466
V58.72	Aftercare following surgery of the nervous system, NEC .....	N	23	465, 466
V58.73	Aftercare following surgery of the circulatory system, NEC .....	N	23	465, 466
V58.74	Aftercare following surgery of the respiratory system, NEC .....	N	23	465, 466
V58.75	Aftercare following surgery of the teeth, oral cavity and digestive system, NEC	N	23	465, 466
V58.76	Aftercare following surgery of the genitourinary system, NEC .....	N	23	465, 466
V58.77	Aftercare following surgery of the skin and subcutaneous tissue, NEC .....	N	23	465, 466
V58.78	Aftercare following surgery of the musculoskeletal system, NEC .....	N	23	465, 466
V71.82	Observation and evaluation for suspected exposure to anthrax .....	N	23	467
V71.83	Observation and evaluation for suspected exposure to other biological agent .....	N	23	467
V83.81	Cystic fibrosis gene carrier .....	N	23	467
V83.89	Other genetic carrier status .....	N	23	467

<sup>1</sup> Classified as an "only secondary diagnosis" in this DRG.

TABLE 6B.—NEW PROCEDURE CODES

Procedure code	Description	OR	MDC	DRG
00.01	Therapeutic ultrasound of vessels of head and neck .....	N		
00.02	Therapeutic ultrasound of heart .....	N		
00.03	Therapeutic ultrasound of peripheral vascular vessels .....	N		
00.09	Other therapeutic ultrasound .....	N		
00.10	Implantation of chemotherapeutic agent .....	N		
00.11	Infusion of drotrecogin alfa (activated) .....	N		
00.12	Administration of inhaled nitric oxide .....	N		

TABLE 6B.—NEW PROCEDURE CODES—Continued

Procedure code	Description	OR	MDC	DRG
00.13	Injection or infusion of nesiritide .....	N		
00.14	Injection or infusion of oxazolidinone class of antibiotics .....	N		
00.50	Implantation of cardiac resynchronization pacemaker without mention of defibrillation, total system [CRT-P].	Y		5 115 <sup>1</sup> , 116 <sup>1</sup>
00.51	Implantation of cardiac resynchronization defibrillator, total system [CRT-D] .....	Y		5 514 <sup>1</sup> , 515 <sup>1</sup>
00.52	Implantation or replacement of transvenous lead (electrode) into left ventricular coronary venous system.	Y		5 115 <sup>2</sup> , 116 <sup>3</sup> , 514 <sup>4</sup> , 515 <sup>4</sup>
00.53	Implantation or replacement of cardiac resynchronization pacemaker pulse generator only [CRT-P].	Y		5 115 <sup>2</sup> , 116 <sup>3</sup> , 118
00.54	Implantation or replacement of cardiac resynchronization defibrillator pulse generator only [CRT-D].	Y		5 115 <sup>1</sup> , 514 <sup>4</sup> , 515 <sup>4</sup>
00.55	Insertion of drug-eluting non-coronary artery stent(s) .....	N		
36.07	Insertion of drug-eluting coronary artery stents(s) .....	N*		5 526, 527
39.72	Endovascular repair or occlusion of head and neck vessels .....	Y		1 1,2,3 5 110, 111 11 315 21 442, 443 24 486
49.75	Implantation or revision of artificial anal sphincter .....	Y		6 157, 158 9 267 21 442, 443 24 486
49.76	Removal of artificial anal sphincter .....	Y		6 157, 158 9 267 21 442, 443 24 486
81.61	360 degree spinal fusion, single incision approach .....	Y		1 4 8 496 21 442, 443 24 486
84.51	Insertion of interbody spinal fusion device .....	N		
84.52	Insertion of recombinant bone morphogenetic protein .....	N		
88.96	Other intraoperative magnetic resonance imaging .....	N		
89.60 <sup>5</sup>	Continuous intra-arterial blood gas monitoring .....	N		
99.76	Extracorporeal immunoabsorption .....	N		
99.77	Application or administration of an adhesion barrier substance .....	N		

<sup>\*</sup> Nonoperating room procedure, but affects DRG.<sup>1</sup> Classified under "operating room procedures".<sup>2</sup> Classified under "operating room procedure" and under "as any of the following procedure combinations" as 00.52 and 00.53.<sup>3</sup> Classified under "any of the following procedure combinations" as 00.52 and 00.53.<sup>4</sup> Classified under "any of the following procedure combinations" as 00.52 and 00.54.<sup>5</sup> This code was discussed at the April 18, 2002 meeting of the ICD-9-CM Coordination and Maintenance Committee and included in the final addendum for ICD-9-CM.

TABLE 6C.—INVALID DIAGNOSIS CODES

Diagnosis code	Description	CC	MDC	DRG
357.8	Other inflammatory and toxic neuropathy .....	N		1 18, 19
359.8	Other myopathies .....	N		1 34, 35
459.1	Postphlebitic syndrome .....	N		5 130, 131
633.0	Abdominal pregnancy .....	N		14 378
633.1	Tubal pregnancy .....	N		14 378
633.2	Ovarian pregnancy .....	N		14 378
633.8	Other ectopic pregnancy .....	N		14 378
633.9	Unspecified ectopic pregnancy .....	N		14 378
770.8	Other respiratory problems after birth .....	N		15 387, 389
771.8	Other infections specific to the perinatal period .....	Y		15 387, 389
779.8	Other specified conditions originating in the perinatal period .....	N		15 390
780.9	Other general symptoms .....	N		23 463, 464
795.0	Nonspecific abnormal Papanicolaou smear of cervix .....	N		13 358, 359, 369
795.3	Nonspecific positive culture findings .....	N		18 423
998.3	Disruption of operation wound .....	Y		21 452, 453
V01.8	Other communicable diseases .....	N		23 467
V13.2	Other genital system and obstetric disorders .....	N		23 467
V23.4	Pregnancy with other poor obstetric history .....	N		14 469
V54.8	Other orthopedic aftercare .....	N		8 249

TABLE 6D.—INVALID PROCEDURE CODES

Note: There are no invalid procedure codes for FY 2003.

TABLE 6E.—REVISED DIAGNOSIS CODE TITLES

Diagnosis code	Description	CC	MDC	DRG
402.00	Hypertensive heart disease, malignant, without heart failure .....	Y	5	134
402.01	Hypertensive heart disease, malignant, with heart failure .....	Y	5	115, 121, 124, 127
402.10	Hypertensive heart disease, benign, without heart failure .....	N	5	134
402.11	Hypertensive heart disease, benign, with heart failure .....	Y	5	115, 121, 124, 127
402.90	Hypertensive heart disease, unspecified, without heart failure .....	N	5	134
402.91	Hypertensive heart disease, unspecified, with heart failure .....	Y	5	115, 121, 124, 127
404.00	Hypertensive heart and renal disease, malignant, without mention of heart failure or renal failure.	Y	5	134
404.01	Hypertensive heart and renal disease, malignant, with heart failure .....	Y	5	115, 121, 124, 127
404.03	Hypertensive heart and renal disease, malignant, with heart failure and renal failure.	Y	5	115, 121, 124, 127
404.10	Hypertensive heart and renal disease, benign, without mention of heart failure or renal failure.	N	5	134
404.11	Hypertensive heart and renal disease, benign, with heart failure .....	Y	5	115, 121, 124, 127
404.13	Hypertensive heart and renal disease, benign, with heart failure and renal failure.	Y	5	115, 121, 124, 127
404.90	Hypertensive heart and renal disease, unspecified, without mention of heart failure or renal failure.	N	5	134
404.91	Hypertensive heart and renal disease, unspecified, with heart failure .....	Y	5	115, 121, 124, 127
404.93	Hypertensive heart and renal disease, unspecified, with heart failure and renal failure.	Y	5	115, 121, 124, 127
414.10	Aneurysm of heart .....	N	5	121, 144, 145
414.11	Aneurysm of coronary vessels .....	N	5	121, 144, 145
414.19	Other aneurysm of heart .....	N	5	121, 144, 145
428.0	Congestive heart failure, unspecified .....	Y	5	115, 121, 124, 127
454.9	Asymptomatic varicose veins .....	N	5	130, 131
627.2	Symptomatic menopausal or female climacteric states .....	N	13	358, 359, 369
627.4	Symptomatic states associated with artificial menopause .....	N	13	358, 359, 369
V49.81	Asymptomatic postmenopausal status (age-related) (natural) .....	N	23	467

TABLE 6F.—REVISED PROCEDURE CODE TITLES

Procedure code	Description	OR	MDC	DRG
02.41 <sup>1</sup>	Irrigation and exploration of ventricular shunt .....	N		
36.06	Insertion of non-drug-eluting coronary artery stents(s) .....	N*	5	517
39.79	Other endovascular repair of aneurysm of other vessels .....	Y	1 5 11 21 24	1, 2, 3 110, 111 315 442, 443 486
39.90	Insertion of non-drug-eluting, noncoronary artery stents(s) .....	N		

<sup>\*</sup> Nonoperating room procedure, but affects DRG.<sup>1</sup> This code title revision was discussed at the April 18, 2002 meeting of the ICD-9-CM Coordination and Maintenance Committee and included in the final addendum for ICD-9-CM.

## Appendix A—Regulatory Impact Analysis

### I. Introduction

We have examined the impacts of this rule as required by Executive Order 12866 (September 1993, Regulatory Planning and Review) and the Regulatory Flexibility Act (RFA) (September 19, 1980, Public Law 96-354), section 1102(b) of the Social Security Act, the Unfunded Mandates Reform Act of 1995 (Public Law 104-4), and Executive Order 13132.

Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is

necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects (\$100 million or more in any 1 year). We have determined that this final rule is a major rule as defined in 5 U.S.C. 804(2). We estimate that the total impact of these changes for FY 2003 payments compared to FY 2002 payments to be approximately a \$0.3 billion increase.

The RFA requires agencies to analyze options for regulatory relief of small businesses. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and government agencies. Most hospitals and most other providers and suppliers are small entities, either by nonprofit status or by having revenues of \$5 million to \$25 million in any 1 year. For purposes of the RFA, all hospitals and other providers and suppliers are considered to be small entities. Individuals and States are not included in the definition of a small entity.

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis for any final rule that may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 603 of the RFA. With the exception of hospitals located in certain New England counties, for purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital with fewer than 100 beds that is located outside of a Metropolitan Statistical Area (MSA) or New England County Metropolitan Area (NECMA). Section 601(g) of the Social Security Amendments of 1983 (Public Law 98-21) designated hospitals in certain New England counties as belonging to the adjacent NECMA. Thus, for purposes of the acute care hospital inpatient prospective payment systems, we classify these hospitals as urban hospitals.

It is clear that the changes being made in this document will affect both a substantial number of small rural hospitals as well as other classes of hospitals, and the effects on some may be significant. Therefore, the discussion below, in combination with the rest of this final rule, constitutes a combined regulatory impact analysis and regulatory flexibility analysis.

Section 202 of the Unfunded Mandates Reform Act of 1995 (Public Law 104-4) also requires that agencies assess anticipated costs and benefits before issuing a final rule that has been preceded by a proposed rule that may result in an expenditure in any one year by State, local, or tribal governments, in the aggregate, or by the private sector, of \$110 million. This final rule will not mandate any requirements for State, local, or tribal governments.

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has Federalism implications. We have reviewed this final rule in light of

Executive Order 13132 and have determined that it will not have any negative impact on the rights, roles, and responsibilities of State, local, or tribal governments.

In accordance with the provisions of Executive Order 12866, this final rule was reviewed by the Office of Management and Budget.

### II. Objectives

The primary objective of the acute care hospital inpatient prospective payment system is to create incentives for hospitals to operate efficiently and minimize unnecessary costs while at the same time ensuring that payments are sufficient to adequately compensate hospitals for their legitimate costs. In addition, we share national goals of preserving the Medicare Trust Fund.

We believe the changes in this final rule will further each of these goals while maintaining the financial viability of the hospital industry and ensuring access to high quality health care for Medicare beneficiaries. We expect that these changes will ensure that the outcomes of this payment system are reasonable and equitable while avoiding or minimizing unintended adverse consequences.

### III. Limitations of Our Analysis

The following quantitative analysis presents the projected effects of our policy changes, as well as statutory changes effective for FY 2003, on various hospital groups. We estimate the effects of individual policy changes by estimating payments per case while holding all other payment policies constant. We use the best data available, but we do not attempt to predict behavioral responses to our policy changes, and we do not make adjustments for future changes in such variables as admissions, lengths of stay, or case-mix. As we have done in previous proposed rules, we solicited comments and information about the anticipated effects of these changes on hospitals and our methodology for estimating them.

We received several comments on the impact analysis for our May 9, 2002 proposed rule.

*Comment:* Several commenters noted that the effects of the proposed expansion to the postacute care transfer policy were not included in the May 9, 2002 proposed rule impact tables. These commenters were concerned that the effect of implementing either of the two proposed expansions of this policy would result in an overall decrease in per case payments in FY 2003.

*Response:* We did not analyze the postacute care transfer policy in the impact tables in the proposed rule because we did not propose a specific policy expansion. We did include overall savings estimates attributable to the provision in the preamble discussion.

*Comment:* Several commenters noted the impact that the large legislated decreases in IME payments and the update factor (market basket increase minus 0.55 percentage point) will have on many hospitals. They argued that these decreases in payments, in combination with our proposals and an update factor of less than inflation, will have an even larger overall impact than indicated

in our impact tables. The commenters indicated that, in a time when other health care costs are escalating due to nursing shortages, rising drug and technology costs, and "skyrocketing" professional and general insurance premiums, hospitals cannot absorb a reduction in inpatient Medicare payments. They argued that decreasing payments and increasing costs will make hospitals less able to make decisions based solely on the needs of the beneficiary and make more decisions based on solvency.

**Response:** As the commenters pointed out, these reductions are legislated by Congress. However, as discussed further below, one of the biggest impacts on the changes in payments from FY 2002 to FY 2003 is the high outlier payments hospitals are receiving in FY 2002 (approximately 7.2 percent of total DRG payments) compared to the FY 2003 estimated 5.1 percent. The net effect of this difference is to reduce the rate of change by 2.1 percentage points.

#### **IV. Hospitals Included in and Excluded From the Acute Care Hospital Inpatient Prospective Payment System**

The prospective payment systems for hospital inpatient operating and capital-related costs encompass nearly all general short-term, acute care hospitals that participate in the Medicare program. There were 44 Indian Health Service hospitals in our database, which we excluded from the analysis due to the special characteristics of the prospective payment method for these hospitals. Among other short-term, acute care hospitals, only the 67 such hospitals in Maryland remain excluded from the acute care hospital inpatient prospective payment system under the waiver at section 1814(b)(3) of the Act.

There are approximately 631 critical access hospitals (CAHs). These small, limited service hospitals are paid on the basis of reasonable costs rather than under the acute care hospital inpatient prospective payment system. The remaining 20 percent are specialty hospitals that are excluded from the acute care hospital inpatient prospective payment system. These hospitals include psychiatric hospitals and units, rehabilitation hospitals and units, long-term care hospitals, children's hospitals, and cancer hospitals. The impacts of our final policy changes on these hospitals are discussed below.

Thus, as of July 2002, we have included 4,230 hospitals in our analysis. This represents about 80 percent of all Medicare-participating hospitals. The majority of this impact analysis focuses on this set of hospitals.

#### **V. Impact on Excluded Hospitals and Hospital Units**

There were 1,065 specialty hospitals excluded from the acute care hospital inpatient prospective payment system. Broken down by specialty, there were 493 psychiatric, 216 rehabilitation, 270 long-term care, 75 children's, and 11 cancer hospitals. In addition, there were 1,436 psychiatric units and 936 rehabilitation units in hospitals otherwise subject to the acute care hospital inpatient prospective payment system. Under § 413.40(a)(2)(i)(A), the rate-

of-increase ceiling is not applicable to the 67 specialty hospitals and units in Maryland that are paid in accordance with the waiver at section 1814(b)(3) of the Act.

In the past, hospitals and units excluded from the acute care hospital inpatient prospective payment system have been paid based on their reasonable costs subject to limits as established by the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA). Hospitals that continue to be paid based on their reasonable costs are subject to TEFRA limits for FY 2003. For these hospitals, the proposed update is the percentage increase in the excluded hospital market basket (currently estimated at 3.5 percent).

Inpatient rehabilitation facilities (IRFs) are paid under the IRF prospective payment system for cost reporting periods beginning on or after January 1, 2002. For cost reporting periods beginning during FY 2003, the IRF prospective payment is based on 100 percent of the adjusted Federal IRF prospective payment amount, updated annually (see the August 7, 2001 final rule (66 FR 41316 through 41430)). Therefore, these hospitals are not impacted by this final rule.

Effective for cost reporting periods beginning during FY 2003, we have proposed that long-term care hospitals would be paid under a long-term care hospital prospective payment system, where long-term care hospitals receive payment based on a 5-year transition period (see the March 22, 2002 proposed rule (67 FR 13416 through 13494)). However, under this proposed payment system, a long-term care hospital may also elect to be paid at 100 percent of the Federal prospective rate at the beginning of any of its cost reporting periods during the 5-year transition period. For purposes of the update factor, the portion of the proposed prospective payment system transition blend payment based on reasonable costs for inpatient operating services would be determined by updating the long-term care hospital's TEFRA limit by the estimate of the excluded hospital market basket (or 3.5 percent).

The impact on excluded hospitals and hospital units of the update in the rate-of-increase limit depends on the cumulative cost increases experienced by each excluded hospital or unit since its applicable base period. For excluded hospitals and units that have maintained their cost increases at a level below the rate-of-increase limits since their base period, the major effect will be on the level of incentive payments these hospitals and hospital units receive. Conversely, for excluded hospitals and hospital units with per-case cost increases above the cumulative update in their rate-of-increase limits, the major effect will be the amount of excess costs that would not be reimbursed.

We note that, under § 413.40(d)(3), an excluded hospital or unit whose costs exceed 110 percent of its rate-of-increase limit receives its rate-of-increase limit plus 50 percent of the difference between its reasonable costs and 110 percent of the limit, not to exceed 110 percent of its limit. In addition, under the various provisions set forth in § 413.40, certain excluded hospitals and hospital units can obtain payment

adjustments for justifiable increases in operating costs that exceed the limit. At the same time, however, by generally limiting payment increases, we continue to provide an incentive for excluded hospitals and hospital units to restrain the growth in their spending for patient services.

#### **VI. Quantitative Impact Analysis of the Policy Changes Under the Hospital Inpatient Prospective Payment System for Operating Costs**

##### *A. Basis and Methodology of Estimates*

In this final rule, we are announcing policy changes and payment rate updates for the hospital inpatient prospective payment systems for operating and capital-related costs. We estimate the total impact of these changes for FY 2003 payments compared to FY 2002 payments to be approximately a \$0.3 billion increase. We have prepared separate impact analyses of the changes to each system. This section deals with changes to the operating prospective payment system.

The data used in developing the quantitative analyses presented below are taken from the FY 2001 MedPAR file and the most current provider-specific file that is used for payment purposes. Although the analyses of the changes to the operating prospective payment system do not incorporate cost data, the most recently available hospital cost report data were used to categorize hospitals. Our analysis has several qualifications. First, we do not make adjustments for behavioral changes that hospitals may adopt in response to these policy changes. Second, due to the interdependent nature of the hospital inpatient prospective payment system, it is very difficult to precisely quantify the impact associated with each change. Third, we draw upon various sources for the data used to categorize hospitals in the tables. In some cases, particularly the number of beds, there is a fair degree of variation in the data from different sources. We have attempted to construct these variables with the best available source overall. For individual hospitals, however, some miscategorizations are possible.

Using cases in the FY 2001 MedPAR file, we simulated payments under the operating prospective payment system given various combinations of payment parameters. Any short-term, acute care hospitals not paid under the acute care hospital inpatient prospective payment systems (Indian Health Service hospitals and hospitals in Maryland) are excluded from the simulations. The impact of payments under the capital prospective payment system, or the impact of payments for costs other than inpatient operating costs, are not analyzed in this section. Estimated payment impacts of FY 2003 changes to the capital prospective payment system are discussed in section IX. of this Appendix.

The changes discussed separately below are the following:

- The effects of the annual reclassification of diagnoses and procedures and the recalibration of the DRG relative weights required by section 1886(d)(4)(C) of the Act.
- The effects of the changes in hospitals' wage index values reflecting wage data from

hospitals' cost reporting periods beginning during FY 1999, compared to the FY 1998 wage data, and the effects of removing from the wage data the costs and hours associated with GME and CRNAs.

- The effects of geographic reclassifications by the MGCRB that will be effective in FY 2003.
- The total change in payments based on FY 2003 policies relative to payments based on FY 2002 policies.

To illustrate the impacts of the FY 2003 changes, our analysis begins with a FY 2003 baseline simulation model using: the FY 2002 DRG GROUPER (version 19.0); the FY 2002 wage index; and no MGCRB reclassifications. Outlier payments are set at 5.1 percent of total DRG plus outlier payments.

Each final and statutory policy change is then added incrementally to this baseline model, finally arriving at an FY 2003 model incorporating all of the changes. This allows us to isolate the effects of each change.

Our final comparison illustrates the percent change in payments per case from FY 2002 to FY 2003. Six factors have significant impacts here. The first is the update to the standardized amounts. In accordance with section 1886(d)(3)(A)(iv) of the Act, as amended by section 301 of Public Law 106-554, we are updating the large urban and the other areas average standardized amounts for FY 2003 using the most recently forecasted hospital market basket increase for FY 2003 of 3.5 percent minus 0.55 percentage points (for an update of 2.95 percent). Under section 1886(b)(3) of the Act, the updates to the hospital-specific amounts for sole community hospitals (SCHs) and for Medicare-dependent small rural hospitals (MDHs) is also equal to the market basket increase of 3.5 percent minus 0.55 percentage points (for an update of 2.95 percent).

A second significant factor that impacts changes in hospitals' payments per case from FY 2002 to FY 2003 is the change in MGCRB status from one year to the next. That is, hospitals reclassified in FY 2002 that are no longer reclassified in FY 2003 may have a negative payment impact going from FY 2002 to FY 2003; conversely, hospitals not reclassified in FY 2002 that are reclassified in FY 2003 may have a positive impact. In some cases, these impacts can be quite substantial, so if a relatively small number of hospitals in a particular category lose their reclassification status, the percentage change in payments for the category may be below the national mean. This effect is alleviated, however, by section 304(a) of Public Law 106-554, which provided that reclassifications for purposes of the wage index are for a 3-year period.

A third significant factor is that we currently estimate that actual outlier payments during FY 2002 will be 7.2 percent of total DRG payments. When the FY 2002 final rule was published, we projected FY 2002 outlier payments would be 5.1 percent of total DRG plus outlier payments; the average standardized amounts were offset correspondingly. The effects of the higher than expected outlier payments during FY 2002 (as discussed in the Addendum to this final rule) are reflected in the analyses below

comparing our current estimates of FY 2002 payments per case to estimated FY 2003 payments per case.

Fourth, section 213 of Public Law 106-554 provided that all SCHs may receive payment on the basis of their costs per case during their cost reporting period that began during 1996. This option was to be phased in over 4 years. For FY 2003, the proportion of payments based on affected SCHs' FY 1996 hospital-specific amount increases from 50 percent to 75 percent.

Fifth, under section 1886(d)(5)(B)(ii) of the Act, the formula for IME is reduced beginning in FY 2003. The reduction is from approximately a 6.5 percent increase for every 10 percent increase in the resident-to-bed ratio during FY 2002 to approximately a 5.5 percent increase.

*Comment:* Numerous commenters expressed concern about the statutory reduction to the IME formula multiplier for FY 2003 of 1.35. The commenters stated that this cut in IME reimbursement will have any extremely detrimental impact on the teaching hospital community.

*Response:* Congress establishes the IME formula multiplier for FY 2003 by law. Any changes to the multiplier must be made through the legislative process.

*Comment:* One commenter stated that the reduction to the IME formula multiplier was not considered in the impact analysis table (67 FR 31670) in the proposed rule. The commenter requested that the large impact due to reduction in IME payments be acknowledged and weighed against the cost to hospitals that would be incurred by the proposed outlier reduction, transfer payment expansion, and the removal of resident salary costs from the wage index.

*Response:* In the May 9, 2002 proposed rule at 67 FR 31670 and 31671, we included several footnotes that explain the various calculations in the impact analysis for FY 2003. Footnote number 9 states that the impact of the reduction in IME adjustment payments is reflected in column 8 of the table, which contains all FY 2003 changes. Thus, we have incorporated the reduction to the IME formula multiplier in the impact analysis of total Medicare hospital expenditures for FY 2003, and have similarly done so in this final rule.

Sixth, the disproportionate share hospital (DSH) adjustment increases in FY 2003 compared with FY 2002. In accordance with section 1886(d)(5)(F)(ix) of the Act, during FY 2002, DSH payments that the hospital would otherwise receive were reduced by 3 percent. This reduction is no longer applicable beginning with FY 2003.

Table I demonstrates the results of our analysis. The table categorizes hospitals by various geographic and special payment consideration groups to illustrate the varying impacts on different types of hospitals. The top row of the table shows the overall impact on the 4,230 hospitals included in the analysis. This number is 555 fewer hospitals than were included in the impact analysis in the FY 2002 final rule (66 FR 40087). Of this number, 437 are now CAHs and are excluded from our analysis.

The next four rows of Table I contain hospitals categorized according to their

geographic location: all urban, which is further divided into large urban and other urban; and rural. There are 2,620 hospitals located in urban areas (MSAs or NECMAs) included in our analysis. Among these, there are 1,519 hospitals located in large urban areas (populations over 1 million), and 1,101 hospitals in other urban areas (populations of 1 million or fewer). In addition, there are 1,610 hospitals in rural areas. The next two groupings are by bed-size categories, shown separately for urban and rural hospitals. The final groupings by geographic location are by census divisions, also shown separately for urban and rural hospitals.

The second part of Table I shows hospital groups based on hospitals' FY 2003 payment classifications, including any reclassifications under section 1886(d)(10) of the Act. For example, the rows labeled urban, large urban, other urban, and rural show that the number of hospitals paid based on these categorizations after consideration of geographic reclassifications are 2,650, 1,576, 1,074, and 1,580, respectively.

The next three groupings examine the impacts of the proposed changes on hospitals grouped by whether or not they have GME residency programs (teaching hospitals that receive an IME adjustment) or receive DSH payments, or some combination of these two adjustments. There are 3,119 nonteaching hospitals in our analysis, 870 teaching hospitals with fewer than 100 residents, and 241 teaching hospitals with 100 or more residents.

In the DSH categories, hospitals are grouped according to their DSH payment status, and whether they are considered urban or rural after MGCRB reclassifications. Hospitals in the rural DSH categories, therefore, represent hospitals that were not reclassified for purposes of the standardized amount or for purposes of the DSH adjustment. (They may, however, have been reclassified for purposes of the wage index.)

The next category groups hospitals considered urban after geographic reclassification, in terms of whether they receive the IME adjustment, the DSH adjustment, both, or neither.

The next five rows examine the impacts of the proposed changes on rural hospitals by special payment groups (SCHs, rural referral centers (RRCs), and MDHs), as well as rural hospitals not receiving a special payment designation. The RRCs (160), SCHs (526), MDHs (241), and hospitals that are both SCH and RRC (76) shown here were not reclassified for purposes of the standardized amount.

The next two groupings are based on type of ownership and the hospital's Medicare utilization expressed as a percent of total patient days. These data are taken primarily from the FY 1999 Medicare cost report files, if available (otherwise FY 1998 data are used). Data needed to determine ownership status were unavailable for 177 hospitals. Similarly, the data needed to determine Medicare utilization were unavailable for 126 hospitals.

The next series of groupings concern the geographic reclassification status of hospitals. The first grouping displays all hospitals that were reclassified by the

MGCRB for FY 2003. The next two groupings separate the hospitals in the first group by

urban and rural status. The final row in Table I contains hospitals located in rural counties

but deemed to be urban under section 1886(d)(8)(B) of the Act.

<sup>1</sup> Because data necessary to classify some hospitals by category were missing, the total number of hospitals in each category may not equal the national total. Discharge data are from FY 2001, and hospital cost report data are from reporting periods beginning in FY 1999 and FY 1998.

<sup>2</sup> This column displays the payment impact of the recalibration of the DRG weights based on FY 2001 MedPAR data and the DRG reclassification changes, in accordance with section 1886(d)(4)(C) of the Act.

<sup>3</sup> This column displays the impact of updating the wage index with wage data from hospitals' FY 1999 cost reports.

<sup>4</sup> This column displays the impact of an 80/20 percent blend of removing the labor costs and hours associated with graduate medical education (GME) and for the Part A costs of certified registered nurse anesthetists (CRNAs).

<sup>5</sup> This column displays the impact of completely removing the labor costs and hours associated with GME and for the Part A costs of CRNAs.

<sup>6</sup> This column displays the combined impact of the reclassification and recalibration of the DRGs, the updated and revised wage data used to calculate the wage index, the phase-out of GME and CRNA costs and hours, and the budget neutrality adjustment factor for DRG and wage index changes, in accordance with sections 1886(d)(4)(C)(iii) and 1886(d)(3)(E) of the Act. Thus, it represents the combined impacts shown in columns 2, 3, 4 and 5, and the FY 2003 budget neutrality factor of 0.993209.

<sup>7</sup> Shown here are the effects of geographic reclassifications by the Medicare Geographic Classification Review Board (MGRB). The effects demonstrate the FY 2003 payment impact of going from no reclassifications to the reclassifications scheduled to be in effect for FY 2003. Reclassification for prior years has no bearing on the payment impacts shown here.

<sup>8</sup> This column shows changes in payments from FY 2002 to FY 2003. It incorporates all of the changes displayed in columns 6 and 7 (the changes displayed in columns 2, 3, 4, and 5 are included in column 6). It also displays the impact of the FY 2003 update, changes in hospitals' reclassification status in FY 2003 compared to FY 2002, and the difference in outlier payments from FY 2002 to FY 2003. It also reflects the gradual phase-in for some SCHs of the full 1996 hospital-specific rate. Finally, the impacts of the reduction in IME adjustment payments, and the increase in the DSH adjustment are shown in this column. The sum of these impacts may be different from the percentage changes shown here due to rounding and interactive effect.

**B. Impact of the Changes to the DRG Reclassifications and Recalibration of Relative Weights (Column 2)**

In column 2 of Table I, we present the combined effects of the DRG reclassifications and recalibration, as discussed in section II. of the preamble to this final rule. Section 1886(d)(4)(C)(i) of the Act requires us to annually make appropriate classification changes and to recalibrate the DRG weights in order to reflect changes in treatment patterns, technology, and any other factors that may change the relative use of hospital resources.

We compared aggregate payments using the FY 2002 DRG relative weights (GROUPER version 19.0) to aggregate payments using the FY 2003 DRG relative weights (GROUPER version 20.0). We note that, consistent with section 1886(d)(4)(C)(iii) of the Act, we have applied a budget neutrality factor to ensure that the overall payment impact of the DRG changes (combined with the wage index changes) is budget neutral. This budget neutrality factor of 0.993209 is applied to payments in Column 6. Because this is a combined DRG reclassification and recalibration and wage index budget neutrality factor, it is not applied to payments in this column.

The DRG changes we are making will result in 0.4 percent higher payments to hospitals overall. This effect is largely attributable to the anticipated higher payments after April 1, 2003 for drug-eluting stents, as described in section II.B. of this final rule. Specifically, we created two new DRGs (526 and 527) to be effective April 1, 2003. The relative weights for these new DRGs are 14 and 16 percent higher, respectively, than the weights for current DRGs 516 and 517, the current DRGs for stents. Hospitals that are currently doing these procedures benefit demonstrate positive impacts from this change in this impact analysis.

Another change is to DRGs 14 (retitled, Intracranial Hemorrhage and Stroke with Infarction) and 15 (retitled, Nonspecific Cerebrovascular Accident and Precerebral Occlusion without Infarction), and new DRG 524 (Transient Ischemia). With the new configuration of these DRGs, over 100,000 cases that previously would have been assigned to DRG 14 (with a FY 2003 relative weight of 1.2943) will now be assigned to DRG 15 (with a FY 2003 relative weight of 0.9858).

Urban hospitals with 300 or more beds, and rural hospitals with 200 or more beds benefit from these changes. Rural hospitals with fewer than 50 beds would experience a 0.3 percent decrease due to these changes, and rural hospitals with between 50 and 99 beds would experience a 0.1 percent decrease. Among rural hospitals categorized by region, the East South Central and West South Central would experience a 0.1 percent decrease in payments. Among special rural hospital categories, SCHs would experience a 0.1 percent decrease and MDHs would experience a 0.2 percent decrease.

**C. Impact of Wage Index Changes (Columns 3, 4, and 5)**

Section 1886(d)(3)(E) of the Act requires that, beginning October 1, 1993, we annually update the wage data used to calculate the wage index. In accordance with this requirement, the wage index for FY 2003 is based on data submitted for hospital cost reporting periods beginning on or after October 1, 1998 and before October 1, 1999. As with column 2, the impact of the new data on hospital payments is isolated in columns 3, 4 and 5 by holding the other payment parameters constant in the three simulations. That is, columns 3, 4, and 5 show the percentage changes in payments when going from a model using the FY 2002 wage index (based on FY 1997 wage data before geographic reclassifications) to a model using the FY 2003 pre-reclassification wage index based on FY 1998 wage data).

The wage data collected on the FY 1999 cost reports are similar to the data used in the calculation of the FY 2002 wage index. Also, as described in section III.B of this preamble, the FY 2003 wage index is calculated by removing 100 percent of hospitals' GME and CRNA costs (and hours). The FY 2002 wage index was calculated by blending 60 percent of hospitals' average hourly wages, excluding GME and CRNA data, with 40 percent of average hourly wages including these data.

Column 3 shows the impacts of updating the wage data using FY 1999 cost reports. This column maintains the same 60/40 phase-out of GME and CRNA costs as the FY 2002 wage index, which is the baseline for comparison. Among regions, the largest impact of updating the wage data is seen in rural Puerto Rico (a 5.4 percent decrease). Rural hospitals in the East South Central region experience the next largest impact, a

0.7 percent increase. Among urban hospitals, Puerto Rico and the Middle Atlantic regions would experience a 0.8 and 0.4 percent decreases, respectively. The Mountain region would experience a 0.5 percent increase.

The next two columns show the impacts of removing the GME and CRNA data from the wage index calculation. Under the 5-year phaseout of these data, FY 2003 would have been the fourth year of the phaseout. This would have meant that, under the phaseout, the FY 2003 wage index would be calculated with 20 percent of the GME and CRNA data included and 80 percent with these data removed, and FY 2004 would begin the calculation with 100 percent of these data removed. However, we are removing 100 percent of GME and CRNA costs from the FY 2003 wage index. To demonstrate the impacts of this provision, we first show the impacts of moving to a wage index with 80 percent of these data removed (Column 4), then show a wage index with 100 percent of these data removed (Column 5). As expected, the impacts in the two columns are similar, with some differences due to rounding. Generally, no group of hospitals is impacted by more than 0.2 percent by this change. Even among the hospital group most likely to be negatively impacted by this change, teaching hospitals with 100 or more residents, the net effect of removing 100 percent of GME and CRNA data is no change in payments.

We note that the wage data used for the final wage index are based upon the data available as of July 2002 and, therefore, do not reflect revision requests received and processed by the fiscal intermediaries after that date.

The following chart compares the shifts in wage index values for labor market areas for FY 2002 relative to FY 2003. This chart demonstrates the impact of the changes for the FY 2003 wage index, including updating to FY 1999 wage data and removing 100 percent of GME and CRNA data. The majority of labor market areas (343) experience less than a 5 percent change. A total of 11 labor market areas experience an increase of more than 5 percent and less than 10 percent. Three areas experience an increase greater than 10 percent. A total of 15 areas experience decreases of more than 5 percent and less than 10 percent. Finally, 1 areas experience declines of 10 percent or more.

	Number of labor market areas	
	FY 2002	FY 2003
Increase more than 10 percent .....	2	3
Increase more than 5 percent and less than 10 percent .....	26	11
Increase or decrease less than 5 percent .....	335	343
Decrease more than 5 percent and less than 10 percent .....	10	15
Decrease more than 10 percent .....	1	1

Among urban hospitals, 42 would experience an increase of between 5 and 10 percent and 9 more than 10 percent. A total of 22 rural hospitals have increases greater than 5 percent, but none have greater than

10-percent increases. On the negative side, 55 urban hospitals have decreases in their wage index values of at least 5 percent but less than 10 percent. Two urban hospitals have decreases in their wage index values greater

than 10 percent. There are 17 rural hospitals with decreases in their wage index values greater than 5 percent or with increases of more than 10 percent. The following chart

shows the projected impact for urban and rural hospitals.

	Percentage change in area wage index values	Number of hospitals	
		Urban	Rural
Increase more than 10 percent .....		9	0
Increase more than 5 percent and less than 10 percent .....		42	22
Increase or decrease less than 5 percent .....		2553	1975
Decrease more than 5 percent and less than 10 percent .....		55	17
Decrease more than 10 percent .....		2	0

*D. Combined Impact of DRG and Wage Index Changes—Including Budget Neutrality Adjustment (Column 6)*

The impact of DRG reclassifications and recalibration on aggregate payments is required by section 1886(d)(4)(C)(iii) of the Act to be budget neutral. In addition, section 1886(d)(3)(E) of the Act specifies that any updates or adjustments to the wage index are to be budget neutral. As noted in the Addendum to this final rule, we compared simulated aggregate payments using the FY 2002 DRG relative weights and wage index to simulated aggregate payments using the FY 2003 DRG relative weights and blended wage index. In addition, we are required to ensure that any add-on payments for new technology under section 1886(d)(5)(K) of the Act are budget neutral. As discussed in section II.D. of this final rule, we are approving one new technology for add-on payments in FY 2003. We estimate the total add-on payments for this new technology will be \$74.8 million.

We computed a wage and recalibration budget neutrality factor of 0.993209. In Table I, the combined overall impacts of the effects of both the DRG reclassifications and recalibration and the updated wage index are shown in column 6. The 0.0 percent impact for all hospitals demonstrates that these changes, in combination with the budget neutrality factor, are budget neutral.

In addition, section 4410 of Public Law 105-33 provides that, for discharges on or after October 1, 1997, the area wage index applicable to any hospital that is not located in a rural area may not be less than the area wage index applicable to hospitals located in rural areas in that State. This provision is required to be budget neutral. The impact of this provision, which is to increase overall payments by 0.1 percent, is not shown in columns 2, 3, 4, and 5. It is included in the impacts shown in column 6.

The changes in this column are the sum of the changes in columns 2, 3, 4, and 5, combined with the budget neutrality factor and the wage index floor for urban areas. There also may be some variation of plus or minus 0.1 percentage point due to rounding.

*E. Impact of MGCRB Reclassifications (Column 7)*

Our impact analysis to this point has assumed hospitals are paid on the basis of their actual geographic location (with the exception of ongoing policies that provide that certain hospitals receive payments on bases other than where they are geographically located, such as hospitals in rural counties that are deemed urban under

section 1886(d)(8)(B) of the Act). The changes in column 6 reflect the per case payment impact of moving from this baseline to a simulation incorporating the MGCRB decisions for FY 2003. These decisions affect hospitals' standardized amount and wage index area assignments.

By February 28 of each year, the MGCRB makes reclassification determinations that will be effective for the next fiscal year, which begins on October 1. The MGCRB may approve a hospital's reclassification request for the purpose of using another area's standardized amount, wage index value, or both. The final FY 2003 wage index values incorporate all of the MGCRB's reclassification decisions for FY 2003. The wage index values also reflect any decisions made by the CMS Administrator through the appeals and review process.

The overall effect of geographic reclassification is required by section 1886(d)(8)(D) of the Act to be budget neutral. Therefore, we applied an adjustment of 0.990672 to ensure that the effects of reclassification are budget neutral. (See section II.A.4.b. of the Addendum to this final rule.)

As a group, rural hospitals benefit from geographic reclassification. Their payments rise 2.4 percent in column 7. Payments to urban hospitals decline 0.4 percent. Hospitals in other urban areas see a decrease in payments of 0.4 percent, while large urban hospitals lose 0.5 percent. Among urban hospital groups (that is, bed size, census division, and special payment status), payments generally decline.

A positive impact is evident among most of the rural hospital groups. The smallest increases among the rural census divisions are 1.1 and 1.6 percent for Mountain and West North Central regions, respectively. The largest increases are in rural South Atlantic and West South Central regions. These regions receive increases of 2.9 and 3.2 percent, respectively.

Among all the hospitals that were reclassified for FY 2003 (including hospitals that received wage index reclassifications in FY 2001 or FY 2002 that extend for 3-years), the MGCRB changes are estimated to provide a 4.5 percent increase in payments. Urban hospitals reclassified for FY 2003 are expected to receive an increase of 4.5 percent, while rural reclassified hospitals are expected to benefit from the MGCRB changes with a 4.5 percent increase in payments. Overall, among hospitals that were reclassified for purposes of the standardized amount only, a payment increase of 0.3 percent is expected, while those reclassified

for purposes of the wage index only show a 4.7 percent increase in payments. Payments to urban and rural hospitals that did not reclassify are expected to decrease slightly due to the MGCRB changes, decreasing by 0.7 for urban hospitals and 0.6 for rural hospitals. Those hospitals located in rural counties but deemed to be urban under section 1886(d)(8)(B) of the Act are expected to receive a decrease in payments of 1.3 percent.

*F. All Changes (Column 8)*

Column 8 compares our estimate of payments per case, incorporating all changes reflected in this proposed rule for FY 2003 (including statutory changes), to our estimate of payments per case in FY 2002. This column includes all of the policy changes to date. Because the reclassifications shown in column 7 do not reflect FY 2002 reclassifications, the impacts of FY 2003 reclassifications only affect the impacts from FY 2002 to FY 2003 if the reclassification impacts for any group of hospitals are different in FY 2003 compared to FY 2002.

It includes the effects of the 2.95 percent update to the standardized amounts and the hospital-specific rates for MDHs and SCHs. It also reflects the 2.1 percentage point difference between the projected outlier payments in FY 2002 (5.1 percent of total DRG payments) and the current estimate of the percentage of actual outlier payments in FY 2002 (7.2 percent), as described in the introduction to this Appendix and the Addendum to this final rule.

Section 213 of Public Law 106-554 provided that all SCHs may receive payment on the basis of their costs per case during their cost reporting period that began during 1996. For FY 2003, eligible SCHs that rebase receive a hospital-specific rate comprised of 25 percent of the higher of their FY 1982 or FY 1987 hospital-specific rate or their Federal rate, and 75 percent of their 1996 hospital-specific rate. The impact of this provision is modeled in column 8 as well.

Under section 1886(d)(5)(B)(ii) of the Act, the formula for IME is reduced beginning in FY 2003. The reduction is from approximately a 6.5 percent increase for every 10 percent increase in the resident-to-bed ratio during FY 2002 to approximately a 5.5 percent increase. We estimate the impact of this change to be a 0.9 percent reduction in hospitals' overall FY 2003 payments. The impact upon teaching hospitals would be larger.

Finally, the DSH adjustment increases in FY 2003 compared with FY 2002. In accordance with section 1886(d)(5)(F)(ix) of

the Act, during FY 2002, DSH payments that the hospital would otherwise receive were reduced by 3 percent. This reduction is no longer applicable beginning with FY 2003. The estimated impact of this change is to increase overall hospital payments by 0.2 percent.

There might also be interactive effects among the various factors comprising the payment system that we are not able to isolate. For these reasons, the values in column 8 may not equal the sum of the changes in columns 6 and 7, plus the other impacts that we are able to identify.

The overall change in payments per case for hospitals in FY 2003 increases by 0.4 percent. Hospitals in urban areas experience a 0.1 percent increase in payments per case compared to FY 2002. Hospitals in rural areas, meanwhile, experience a 2.1 percent payment increase. Hospitals in large urban areas experience a 0.2 percent decline in payments, largely due to the reduction in IME payments. The impact of the reduction in IME payments is most evident among teaching hospitals with 100 or more

residents, who would experience a decrease in payments per case of 1.4 percent.

Among urban census divisions, the largest payment increase was 1.7 percent in the Mountain region. Hospitals in urban Middle Atlantic would experience an overall decrease of 1.4 percent and hospitals in the New England region would experience a decrease of 0.3 percent. This is primarily due to the combination of the negative impact on these hospitals of reducing IME and the lower outlier payments during FY 2003. The only hospital category experiencing overall payment decreases is Puerto Rico, where payments decrease by 2.7 percent, largely due to the updated wage data. In the East North Central region, payments appear to increase by 2.6 percent. Mountain and West North Central regions also benefited, both with 2.5 percent increases.

Among special categories of rural hospitals, those hospitals receiving payment under the hospital-specific methodology (SCHs, MDHs, and SCH/RRCs) experience payment increases of 2.7 percent, 2.5 percent, and 3.1 percent, respectively. This outcome

is primarily related to the fact that, for hospitals receiving payments under the hospital-specific methodology, there are no outlier payments. Therefore, these hospitals do not experience negative payment impacts from the decline in outlier payments from FY 2002 to FY 2003 as do hospitals paid based on the national standardized amounts.

Hospitals that were reclassified for FY 2003 are estimated to receive a 1.2 percent increase in payments. Urban hospitals reclassified for FY 2003 are anticipated to receive an increase of 0.1 percent, while rural reclassified hospitals are expected to benefit from reclassification with a 1.9 percent increase in payments. Overall, among hospitals reclassified for purposes of the standardized amount, a payment increase of 1.0 percent is expected, while those hospitals reclassified for purposes of the wage index only show an expected 0.8 percent increase in payments. Those hospitals located in rural counties but deemed to be urban under section 1886(d)(8)(B) of the Act are expected to receive an increase in payments of 2.7 percent.

TABLE II.—IMPACT ANALYSIS OF CHANGES FOR FY 2003 OPERATING PROSPECTIVE PAYMENT SYSTEM  
[Payments per case]

	Num. of hosp.	Average FY 2002 payment per case <sup>1</sup>	Average FY 2003 payment per case <sup>1</sup>	All FY 2003 changes

<sup>1</sup> These payment amounts per case do not reflect any estimates of annual case-mix increase.

Table II presents the projected impact of the changes for FY 2003 for urban and rural hospitals and for the different categories of hospitals shown in Table I. It compares the estimated payments per case for FY 2002 with the average estimated per case payments for FY 2003, as calculated under our models. Thus, this table presents, in terms of the average dollar amounts paid per discharge, the combined effects of the changes presented in Table I. The percentage changes shown in the last column of Table II equal the percentage changes in average payments from column 8 of Table I.

## VII. Impact of Specific Policy Changes

### A. Impact of Changes Relating to Payment for the Clinical Training Portion of Clinical Psychology Training Programs

In section V.I.5. of the preamble to this final rule, we have revised our policy on Medicare payment for approved nursing and allied health education programs to permit payment for the costs incurred by a provider for the clinical training portion of clinical psychology training programs.

Our actuarial estimates indicate that there will be a fiscal impact of \$40 million the first year after payments begin, growing to \$50 million by the 5th year (\$220 million over 5 years). Costs are expected to increase because we believe that Medicare's support through its education regulations will encourage hospitals to report more costs for clinical psychology training programs than are reported today. This estimate is based on assumptions as to how much Medicare could pay for additional educational programs and how quickly other providers with clinical training portions would begin seeking those payments.

The following chart shows projected costs to the Medicare program for the next 5 years:

Fiscal year	Medicare program costs (in millions)
2003 .....	\$40
2004 .....	40
2005 .....	40
2006 .....	50
2007 .....	50

### B. Impact of Changes Relating to EMTALA Provisions

We are addressing proposed changes related to the EMTALA provisions in a separate final rule to be published at a later date.

### C. Impact of Policy Changes Relating to Provider-Based Entity

In section V.K. of the preamble of this proposed rule, we discuss our proposed Medicare payment policy changes relating to determinations of provider-based status for entities of main providers. These changes are intended to focus mainly on issues raised by the hospital industry surrounding the provider-based regulations and to allow for a orderly and uniform implementation strategy once the grandfathering provision for these entities expires on September 30, 2002.

Because we believed it would be difficult to quantify the impact of these changes, in the May 9, 2002 proposed rule, we solicited comments on these issues. However, we received no comments that would assist us in developing a quantitative analysis of impact. Therefore, we are not able to prepare such an analysis.

## VIII. Impact of Policies Affecting Rural Hospitals

### A. Raising the Threshold To Qualify for the CRNA Pass-Through Payments

In section V. of the preamble of this final rule, we are raising the maximum number of surgical procedures (including inpatient and outpatient procedures) requiring anesthesia services that a rural hospital may perform to qualify for pass-through payments for the costs of CRNAs to 800 from 500. Currently, we have identified 622 hospitals that qualify under this provision.

To measure the impact of this provision, we determined that approximately half of the hospitals that would appear to be eligible based on the current number of procedures appear to receive this adjustment. In order to be eligible, hospitals must employ the CRNA and the CRNA must agree not to bill for services under Part B. We estimate approximately 90 rural hospitals would qualify under the increased maximum volume threshold. If one-half of these hospitals then met the other criteria, 45 additional hospitals would be eligible for these pass-through payments under this change.

### B. Removal of Requirement for CAHs To Use State Resident Assessment Instrument

In section VII. of the preamble of this final rule, we are eliminating the requirement that CAHs use the State resident assessment instrument (RAI) to conduct patient assessments. There are approximately 600 CAHs. The overwhelming majority of CAHs, 95 percent, or approximately 270 CAHs, provide SNF level care. The elimination of the requirement to use the State RAI will greatly reduce the burden on CAHs because facilities will no longer be required to complete an RAI document for each SNF patient (which would involve approximately 12,000 admissions based on the most recent claims data). Facilities would have the flexibility to document the assessment data in the medical record in a manner appropriate for their facility. The elimination of the requirement for use of the State RAI will reduce the amount of time required to perform patient assessments and allow more time for direct patient care.

## IX. Impact of Changes in the Capital Prospective Payment System

### A. General Considerations

Fiscal year 2001 was the last year of the 10-year transition period established to phase in the prospective payment system for hospital capital-related costs. During the transition period, hospitals were paid under one of two payment methodologies: fully prospective or hold harmless. Under the fully prospective methodology, hospitals were paid a blend of the Federal rate and their hospital-specific

rate (see § 412.340). Under the hold-harmless methodology, unless a hospital elected payment based on 100 percent of the Federal rate, hospitals were paid 85 percent of reasonable costs for old capital costs (100 percent for SCHs) plus an amount for new capital costs based on a proportion of the Federal rate (see § 412.344). As we state in section VI.A. of the preamble of this final rule, the end of the 10-year transition period ending with hospital cost reporting periods beginning on or after October 1, 2001 (FY 2002), capital prospective payment system payments for most hospitals are based solely on the Federal rate in FY 2003. Therefore, we no longer include information on obligated capital costs or projections of old capital costs and new capital costs, which were factors needed to calculate payments during the transition period, for our impact analysis.

In accordance with § 412.312, the basic methodology for determining a capital prospective payment system payment is: (Standard Federal Rate) x (DRG weight) x (Geographic Adjustment Factor(GAF)) x (Large Urban Add-on, if applicable) x (COLA adjustment for hospitals located in Alaska and Hawaii) x (1 + Disproportionate Share (DSH) Adjustment Factor + Indirect Medical Education (IME) Adjustment Factor, if applicable).

In addition, hospitals may also receive outlier payments for those cases that qualify under the threshold established for each fiscal year.

The data used in developing the impact analysis presented below are taken from the March 2002 update of the FY 2001 MedPAR file and the March 2002 update of the Provider Specific File that is used for payment purposes. Although the analyses of the changes to the capital prospective payment system do not incorporate cost data, we used the June 2002 update of the most recently available hospital cost report data (FY 1999) to categorize hospitals. Our analysis has several qualifications. First, we do not make adjustments for behavioral changes that hospitals may adopt in response to policy changes. Second, due to the interdependent nature of the prospective payment system, it is very difficult to precisely quantify the impact associated with each change. Third, we draw upon various sources for the data used to categorize hospitals in the tables. In some cases (for instance, the number of beds), there is a fair degree of variation in the data from different sources. We have attempted to construct these variables with the best available sources overall. However, for individual hospitals, some miscategorizations are possible.

Using cases from the March 2002 update of the FY 2001 MedPAR file, we simulated payments under the capital prospective payment system for FY 2002 and FY 2003 for a comparison of total payments per case. Any short-term, acute care hospitals not paid under the general hospital inpatient prospective payment systems (Indian Health Service Hospitals and hospitals in Maryland) are excluded from the simulations.

As we explain in section III.A.4. of the Addendum of this final rule, payments will no longer be made under the regular

exceptions provision under §§ 412.348(b) through (e). Therefore, we are no longer using the actuarial capital cost model (described in Appendix B of August 1, 2001 final rule (66 FR 40099)). We modeled payments for each hospital by multiplying the Federal rate by the GAF and the hospital's case-mix. We then added estimated payments for indirect medical education, disproportionate share, large urban add-on, and outliers, if applicable. For purposes of this impact analysis, the model includes the following assumptions:

- We estimate that the Medicare case-mix index will increase by 0.99800 percent in FY 2002 and will increase by 1.01505 percent in FY 2003.

- We estimate that the Medicare discharges will be 13,398,000 in FY 2002 and 13,658,000 in FY 2003 for a 1.9 percent increase from FY 2002 to FY 2003.

- The Federal capital rate was updated beginning in FY 1996 by an analytical framework that considers changes in the prices associated with capital-related costs and adjustments to account for forecast error, changes in the case-mix index, allowable changes in intensity, and other factors. The FY 2003 update is 1.1 percent (see section III.A.1.a. of the Addendum to this final rule).

- In addition to the FY 2003 update factor, the FY 2003 Federal rate was calculated based on a GAF/DRG budget neutrality factor of 0.9957, an outlier adjustment factor of 0.9469, an exceptions adjustment factor of 0.9970, and a special adjustment for FY 2003 of 1.0255 (see section III.A. of the Addendum of this final rule).

## 2. Results

In the past, in this impact section we presented the redistributive effects that were expected to occur between "hold-harmless" hospitals and "fully prospective" hospitals and a cross-sectional summary of hospital groupings by the capital prospective payment system transition period payment methodology. We are no longer including this information since all hospitals (except new hospitals under § 412.324(b) and under § 412.32(c)(2)) are paid 100 percent of the Federal rate in FY 2003.

We used the actuarial model described above to estimate the potential impact of our

changes for FY 2003 on total capital payments per case, using a universe of 4,230 hospitals. As described above, the individual hospital payment parameters are taken from the best available data, including the March 2002 update of the FY 2001 MedPAR file, the March 2002 update to the Provider-Specific File, and the most recent cost report data from the June 2002 update of HCRIS. In Table III, we present a comparison of total payments per case for FY 2002 compared to FY 2003 based on FY 2003 payment policies. Column 3 shows estimates of payments per case under our model for FY 2002. Column 4 shows estimates of payments per case under our model for FY 2003. Column 5 shows the total percentage change in payments from FY 2002 to FY 2003. The change represented in Column 5 includes the 1.1 percent update to the Federal rate, a 1.01505 percent increase in case-mix, changes in the adjustments to the Federal rate (for example, the effect of the new hospital wage index on the geographic adjustment factor), and reclassifications by the MGCRB, as well as changes in special exception payments. The comparisons are provided by: (1) geographic location; (2) region; and (3) payment classification.

The simulation results show that, on average, capital payments per case can be expected to increase 3.8 percent in FY 2003. Our comparison by geographic location shows an overall increase in payments to hospitals in all areas. This comparison also shows that urban and rural hospitals will experience slightly different rates of increase in capital payments per case (3.6 percent and 4.8 percent, respectively). This difference is due to a projection that urban hospitals will experience a larger decrease in outlier payments from FY 2002 to FY 2003 compared to rural hospitals.

All regions are estimated to receive an increase in total capital payments per case, partly due to the elimination of the 2.1 percent reduction to the Federal rate for FY 2003 (see section VI.D. of the preamble of this final rule). Changes by region vary from a minimum increase of 2.7 percent (Pacific urban region) to a maximum increase of 5.3 percent (East North Central rural region). Hospitals located in Puerto Rico are expected

to experience an increase in total capital payments per case of 4.4 percent.

By type of ownership, government hospitals are projected to have the largest rate of increase of total payment changes (4.2 percent). Similarly, payments to voluntary hospitals will increase 4.1 percent, while payments to proprietary hospitals will increase 2.1 percent.

Section 1886(d)(10) of the Act established the MGCRB. Hospitals may apply for reclassification for purposes of the standardized amount, wage index, or both. Although the Federal capital rate is not affected, a hospital's geographic classification for purposes of the operating standardized amount does affect a hospital's capital payments as a result of the large urban adjustment factor and the disproportionate share adjustment for urban hospitals with 100 or more beds. Reclassification for wage index purposes also affects the geographic adjustment factor, since that factor is constructed from the hospital wage index.

To present the effects of the hospitals being reclassified for FY 2003 compared to the effects of reclassification for FY 2002, we show the average payment percentage increase for hospitals reclassified in each fiscal year and in total. For FY 2003 reclassifications, we indicate those hospitals reclassified for standardized amount purposes only, for wage index purposes only, and for both purposes. The reclassified groups are compared to all other nonreclassified hospitals. These categories are further identified by urban and rural designation.

Hospitals reclassified for FY 2003 as a whole are projected to experience a 4.5 percent increase in payments. Payments to nonreclassified hospitals will increase slightly less (3.7 percent) than reclassified hospitals, overall. Hospitals reclassified during both FY 2002 and FY 2003 are projected to receive an increase in payments of 4.1 percent. Hospitals reclassified during FY 2003 only are projected to receive an increase in payments of 8.6 percent. This increase is primarily due to changes in the GAF (wage index).

**Appendix B: Recommendation of Update Factors for Operating Cost Rates of Payment for Inpatient Hospital Services**

*I. Background*

Consistent with section 1886(e)(5)(B) of the Act, in this final rule we are publishing our final recommendations for updating hospital payments for FY 2003. In accordance with section 1886(d)(3)(A) and section 1886(b)(3)(B)(i)(XVIII) of the Act, we are updating the standardized amounts for FY 2003 equal to the rate of increase in the hospital market basket minus 0.55 percentage points for acute inpatient prospective payments to hospitals in all areas. Section 1886(b)(3)(B)(iv) of the Act sets the FY 2003 percentage increase in the hospital-specific rates applicable to SCHs and MDHs equal to the rate of increase in the market basket minus 0.55 percentage points.

Based on the revised and rebased second quarter 2002 forecast of the FY 2003 market basket increase of 3.5 percent, the update to the standardized amounts for hospitals subject to the acute inpatient prospective payment system is 2.95 percent (that is, the market basket rate of increase minus 0.55 percentage points) for hospitals in both large urban and other areas. The update to the hospital-specific rate applicable to SCHs and MDHs is also 2.95 percent. In the proposed rule, the market basket was 3.3 percent, for proposed update factors of 2.75 percent.

Under section 1886(b)(3)(B)(ii)(VIII) of the Act, the FY 2003 percentage increase in the rate-of-increase limits for hospitals and hospital units excluded from the acute inpatient prospective payment system is equal to the market basket percentage increase. Facilities excluded from the acute inpatient prospective payment system include psychiatric hospitals and units, rehabilitation hospitals and units, long-term care hospitals, cancer hospitals, and children's hospitals.

In the past, hospitals and hospital units excluded from the acute inpatient prospective payment system have been paid based on their reasonable costs subject to limits as established by the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA). Hospitals that continue to be paid based on their reasonable costs are subject to TEFRA limits for FY 2003. For these hospitals, the update is the percentage increase in the excluded hospital market basket (currently estimated at 3.5 percent).

Inpatient rehabilitation facilities (IRFs) are paid under the IRF prospective payment

system for cost reporting periods beginning on or after January 1, 2002. For cost reporting periods beginning during FY 2003, the Federal prospective payment for IRFs is based on 100 percent of the adjusted Federal IRF prospective payment amount, updated annually (see the August 7, 2001 final rule (66 FR 41316)).

Effective for cost reporting periods beginning during FY 2003, we have proposed that long-term care hospitals would be paid under a prospective payment system based on a 5-year transition period (see the March 22, 2002 proposed rule (67 FR 13416)). We also proposed that a long-term care hospital may elect to be paid on 100 percent of the Federal prospective payment rate at the beginning of any of its cost reporting periods during the 5-year transition period. For purposes of the update factor, the portion of the proposed prospective payment system transition blend payment based on reasonable costs for inpatient operating services would be determined by updating the long-term care hospital's TEFRA limit by the current estimate of the excluded hospital market basket (or 3.5 percent).

Section 1886(e)(4) of the Act requires that the Secretary, taking into consideration the recommendations of the Medicare Payment Advisory Commission (MedPAC), recommend update factors for inpatient hospital services for each fiscal year that take into account the amounts necessary for the efficient and effective delivery of medically appropriate and necessary care of high quality. Under section 1886(e)(5) of the Act, we are required to publish the update factors recommended under section 1886(e)(4) of the Act. Accordingly, we published the FY 2003 update factors recommended by the Secretary as Appendix C in the May 9, 2002 proposed rule (67 FR 31685). In that appendix, we discussed the recommendations of appropriate update factors and the analysis underlying our recommendations. We also responded to MedPAC's recommendations concerning the update factors.

**II. Secretary's Final Recommendations for Updating the Prospective Payment System Standardized Amounts**

In recommending an update, the Secretary takes into account the factors in the update framework, as well as other factors such as the recommendations of MedPAC, the long-term solvency of the Medicare Trust Funds, and the capacity of the hospital industry to continually provide access to high quality care to Medicare beneficiaries through

adequate reimbursement to health care providers.

*Comment:* Numerous commenters pointed out the negative impact of reducing the market basket estimate by 0.55 percentage points. However, the commenters acknowledged that the statute requires an update to payments for FY 2002 of the market basket percentage increase minus 0.55 percentage points. One commenter stated that another year of "market basket minus" update was unsustainable.

*Response:* The commenters are correct that the 0.55 percentage point reduction from the market basket in calculating the update factor is required by statute.

Our final recommendation of the update is market basket minus 0.55 percentage points, which is consistent with current law, and does not differ from the proposed recommendation. However, the second quarter forecast of the market basket percentage increase is 3.5 for prospective payment hospitals (up from 3.3 percent estimated in the proposed rule). Thus, the Secretary's final recommendation is that the update to the prospective payment system standardized amounts for both large urban and other urban areas is 2.95 percentage points. The update to the hospital-specific rate applicable to SCHs and MDHs is also 2.95 percent (or consistent with current law, market basket percentage increase minus 0.55 percentage points).

**III. Secretary's Final Recommendation for Updating the Rate-of-Increase Limits for Excluded Hospitals and Hospital Units**

We received no comments concerning our proposed recommendation for updating the rate-of-increase for excluded hospitals and hospital units. Our final recommendation does not differ from the proposed recommendation. However, the second quarter forecast of the market basket percentage increase is 3.5 for excluded hospitals and hospital units (up from 3.4 percent estimated in the proposed rule).

For cost reporting periods beginning on or after October 1, 2002, the IRF prospective payment is based on 100 percent of the adjusted Federal IRF prospective payment system amount updated annually.

For purposes of the proposed long-term care hospital prospective payment system update factor, the portion of the transition blend payment based on reasonable costs for inpatient operating services for FY 2003 would be determined by updating the TEFRA target amount for long-term care hospitals by

the most recent available estimate of the increase in the excluded hospital operating market basket (or 3.5 percent).

Thus, the Secretary's final recommendation is that the update for the remaining hospitals and hospital units

excluded from the acute inpatient prospective payment system is 3.5 percent.
